

Senior Project Architect/Associate

We are looking for an individual with experience in master-planning and running projects looking to progress their career to join our dynamic team. We provide exceptional design solutions and technical expertise to all our clients. With over 50 years of experience, across a wide range of sectors, our vast array of industry connections, insights, and knowledge, enables us to provide the best service possible to our clients.

If you have a strong passion for design and a comprehensive understanding of architectural principles. This role is for you. You will be responsible for managing projects from conception through to completion, ensuring that all designs meet regulatory standards and client expectations.

What's on offer

- Competitive salary
- Holiday allowance/Birthday Holiday/Long Service Reward
- Excellent career progression and career support, enhanced study funded opportunities
- Exposure to a diverse range of exciting projects
- A vibrant creative and supportive working environment
- Mentoring scheme from the Partners
- Employee Assistance Programme
- Early Finish Friday
- Company days out

Responsibilities

- Leading and managing a team across multiple projects of all RIBA stages
- Produce accurate construction information including technical details, specification and schedule of work
- Submit detailed planning and building regulation applications in accordance with current CDM health and safety regulations
- Attend site visits to carry out site surveys and deal with general and technical queries
- Contribute to the development and growth of the team
- Proactive in staying informed about industry trends, emerging technologies, and best practices
- Preparing design proposals using Revit, CAD and traditional methods
- Contributing to the detailed design process and co-ordinating detailed design information
- Ability to financial budget and meet deadlines

Skills

The Partnership requires the Senior Project Architect/Associate to be aware of the following key themes and tasks that are expected to be incorporated within the scope of their role:

Client relationships – Project Management – Business Development

- Trust & respect
- Brief analysis and development
- Design leadership
- Team leadership
- Time & cost management
- Design & technical reviews
- Multi-project involvement
- Strong communication, presentation, and interpersonal skills

Specialist Knowledge

- Use specialist skills and knowledge to promote business opportunities
- Convey and exchange specialist skills and knowledge to all staff
- Proficiency in Sketchup, AutoCAD, and Revit for architectural design and project management.
- Strong leadership and communication skills to effectively manage teams and client relationships.
- Familiarity with Adobe Creative Suite and ArchiCAD for design presentations and documentation.
