
ARCHITECTURAL TECHNOLOGIST

Join Brock Carmichael Architects

At Brock Carmichael, we design places that create lasting value for people and communities. With over 50 years of experience, we deliver innovative architectural solutions across residential, commercial, education, healthcare, regeneration and heritage sectors.

We're looking for an experienced Architectural Technologist to join our Liverpool studio and work on a portfolio of high-profile, technically challenging projects, including Higher-Risk Buildings (HRBs). You'll play a key role in developing and delivering detailed technical information, working closely with Project Architects, Technical Leads, consultants, contractors and clients to ensure projects are coordinated and delivered to a high standard.

What You'll Be Doing

You'll be involved in the technical delivery of projects, including:

- Leading Producing high-quality detailed architectural and technical drawings for construction.
- Developing detailed technical information from design development through to construction.
- Working on complex residential and other Higher-Risk Building projects, supporting compliance with Building Regulations and relevant legislation.
- Preparing and coordinating information required for Building Regulations and construction stages.

- Developing detailed construction information, specifications, schedules and drawing packages.
- Coordinating architectural information with structural, MEP and other specialist consultants.
- Reviewing technical information and identifying coordination issues, discrepancies and potential risks.
- Working collaboratively with Project Architects, Technical Leads and multidisciplinary teams to resolve technical challenges.
- Supporting the preparation and coordination of information required for Gateway submissions and the delivery of the Building Safety Act requirements where applicable.
- Maintaining accurate and coordinated project information and supporting effective document control.
- Attending design team, technical and site meetings where required.
- Liaising with contractors, manufacturers and suppliers to resolve technical queries and develop appropriate construction solutions.
- Assisting with the review of technical proposals, samples, specifications and construction information.
- Working collaboratively to deliver projects on programme, within budget and to the required quality standards.
- Contributing technical knowledge and ideas that improve both projects and the wider practice.

What We're Looking For

You'll ideally have:

- Proven experience working as an Architectural Technologist within an architectural practice, consultancy or construction environment.
- Strong technical knowledge and experience in the preparation of detailed architectural and construction information.
- Experience working on complex and technically demanding projects, ideally including residential or Higher-Risk Buildings.

- A good understanding of Building Regulations and current technical standards, with an awareness of the Building Safety Act and requirements applicable to HRBs.
- Experience coordinating architectural information with structural, MEP and other specialist consultants.
- Proficient in industry-standard architectural and technical software, with strong proficiency in Revit/BIM advantageous.
- An understanding of BIM processes, information management and coordinated project delivery.
- Excellent attention to detail and a methodical approach to technical information.
- Strong problem-solving skills and the ability to identify and resolve technical issues.
- Strong communication and organisational skills.
- The ability to manage multiple priorities and work effectively to project deadlines.
- A collaborative attitude and willingness to learn and develop.
- A commitment to producing high-quality, accurate technical information.
- Experience working within a quality management system such as ISO 9001 would be advantageous.

We Offer

We believe great architecture comes from great people. That's why we invest in your professional development and wellbeing.
